Department of Arabic Language for Non-Native & Native Speakers & Islamic & UAE Social studies at GAA

Dear parents,

We, in the Arabic language Department, aim to facilitate the use of Arabic to communicate and engage in various events and attitudes to help our students to interact and participate in the acquisition of Arabic language skills. We always strive to innovate to attract students and their involvement in the educational environment as in modern international schools.

The curriculum of Arabic for native and non-native students is based and bound to the syllabus given by the Ministry of Education .Students are supposed to be taught, evaluated and tested on the basis of the previously mentioned curriculum and the PYP program. However, we tried our best to develop our educational strategy, here in our section, through adopting several extra projects by which we aspire to grant additional teaching values to our students. Daily life methods were introduced to our students that enable them to broaden their language skills effectively.

Kind Regards

Manal Alhomsy

Elementary Arabic Coordinator
